

[STAY LOGGED IN](#) · [WHAT'S NEW](#) · [HOW TO USE](#)

One tap. Every meal.

Log in once. Stay logged in forever.

No more OTPs every time you open the app.

Stay logged in — no more repeat OTPs.

We've upgraded how Cravitoo remembers your employees. Once they sign in with their corporate email OTP, they stay signed in on that device — even after closing the app, restarting the phone, or a full weekend of not using it.

Corporate email verification remains the **only** way to sign in. Nothing about your access control changes.

Under the hood — 30-second explanation

Every time an employee opens the app, Cravitoo silently renews their session in the background. The session keeps rolling forward as long as they use it. Only three things end a session: they tap **Log Out**, their account is disabled by an admin, or their corporate email is removed from the allowlist. That's it.

Scenario	Before	Now
Reopen the app next morning	Asked for OTP again	Instant — logged in
After a weekend / holiday break	Asked for OTP again	Instant — logged in
Force-quit + reopen on iPhone	Asked for OTP again	Instant — logged in
Away for 2 weeks with no internet	Asked for OTP again	Instant on reconnect
Tap Log Out	Signed out	Signed out (unchanged)
Admin disables the account	Stayed signed in briefly	Signed out on next tap
Corporate email removed from allowlist	Stayed signed in briefly	Signed out on next tap

IMPORTANT · DO THIS ONCE

Ask employees who already have Cravitoo on their home screen to **delete the old icon and add it again** from Safari or Chrome. This one-time refresh lets iOS/Android pick up the new persistent-session setup. After that, they never sign in again.

Your 6-step access journey.

From zero to eating — under two minutes.

01 Open the web app Go to app.cravitoo.com on your phone browser.	02 Enter corporate email Use your official company email address.	03 Receive OTP A 6-digit code arrives in your work inbox in seconds.
04 Verify & sign in Type the code — you're in.	05 Add to Home Screen One tap to add Cravitoo to your home screen.	06 Order — forever Never sign in again. Just tap the icon and order.

WHAT YOU NEED

Just your **corporate email** and a phone (any Android or iPhone from the last 6 years). No app store, no downloads, no waiting for IT.

iPhone / iPad — one-tap access.

1 Open Safari

Cravitoo **must** be added from Safari — not Chrome or any other browser on iOS.

2 Visit app.cravitoo.com

Sign in with your corporate email and OTP (this one time only).

3 Tap the Share button

The square-with-arrow icon at the bottom centre of Safari.

4 Choose 'Add to Home Screen'

Scroll down in the share sheet until you see this option.

5 Tap Add

Rename if you like — the default is 'Cravitoo'. Tap **Add** in the top-right.

6 Launch from home screen

Tap the new Cravitoo icon. You are already signed in — start ordering.

TIP · SAFARI ONLY ON IOS

iOS only lets Safari add web apps to the home screen. Even if you normally use Chrome, use Safari for this one step. After it's added, the home-screen icon opens directly in app mode — no browser bar, no address bar.

Android — install as an app.

1 Open Chrome

Any Chromium browser works (Chrome, Samsung Internet, Edge).

2 Visit app.cravitoo.com

Sign in with your corporate email and OTP (this one time only).

3 Tap the three-dot menu

Top-right corner of Chrome.

4 Choose 'Install app' or 'Add to Home screen'

The wording depends on your Android version — both do the same thing.

5 Confirm Install

Chrome shows a preview. Tap **Install**.

6 Launch from home screen

The Cravitoo icon appears with your other apps. Tap it — you're already signed in.

TIP · FULL-APP FEEL

On Android, the installed Cravitoo behaves like a real app — its own icon, its own app switcher card, its own notifications badge. Employees rarely realise it's a web app.

Order in under 30 seconds.

1 Open Cravitoo from your home screen

You are already signed in — no OTP, no login screen.

2 Pick your cafeteria vendor

See today's menu with photos, veg/non-veg tags and allergens.

3 Add items to cart

Multiple vendors? No problem — each has its own cart.

4 Tap Place Order

The Razorpay payment popup opens — pay with UPI, card, or netbanking.

5 Receive your Collection Code

A CRV-code and QR appear on your screen the moment payment succeeds.

6 Show the QR at the counter

The vendor scans it — your order is marked collected. Done.

SECURITY · HOW YOUR ACCOUNT STAYS SAFE

Sessions are encrypted end-to-end. If your phone is lost, you can log out remotely from any other browser, and the corporate admin can instantly disable your account from the Master Panel — killing every session on every device.

If something feels off.

Issue	Fix
I still get asked for OTP every time I open the app.	Delete the old Cravitoo icon from the home screen, then add it again from Safari (iOS) or Chrome (Android). One-time step.
I didn't receive the OTP.	Check spam. If missing, tap 'Resend' after 60 seconds. If still missing, forward the request to support@cravitoo.com .
The Razorpay popup doesn't open.	Check the phone's internet. If on corporate WiFi, ensure app.cravitoo.com is whitelisted. Try mobile data as a test.
I was signed out unexpectedly.	This only happens if your corporate email was removed from the allowlist, an admin disabled your account, or you tapped Log Out. Contact your admin.
I want to remove my account.	Tap Profile → Log Out on every device. To fully delete, email support@cravitoo.com from your corporate email.

Need help? We're here.

Email: support@cravitoo.com · **Web:** app.cravitoo.com · **Response:** within 4 working hours (Mon–Sat, 09:00 – 19:00 IST).

For corporate onboarding, allowlist changes, or bulk employee provisioning, please write to **partners@cravitoo.com** with your Corporate Client ID.
